

E'SY

OVERVIEW

Salons in Japan have long realised that the shampoo is an important part of the overall service provided by the hairdresser. Motorised Shampoo chairs were designed to turn what is normally an uncomfortable necessity into an enjoyable luxury. Soon, salons discovered that this type of service attracted clients and not only that, they were prepared to pay extra for it. Takara motorised Shampoo chairs have always been considered the pinnacle of comfort and luxury, now with the E'sy chair range, that luxury and comfort has been taken a stage further.

The new E'sy Shampoo chairs are designed to give total and complete relaxing support to the customer as they lay at the backwash without any pressure on the neck. A brand new feature of the E'sy chair is the side adjustment switch with which slight adjustments can be made to the chair's height to attain each customer's perfect position. The chair is also available with either a raising or seated leg section (model 271), so there is a chair to suit all shampoo areas.
