

SHAMPOO STATION

OVERVIEW

The SHAMPOO STATION is an elegant and clever Shampoo unit that allows the basin to be moved away from the client.

Designed to cover two separate positions, the RS Swing enables the salon to carry out such services as relaxing hair treatments and intricate technical work at the backwash without the customer moving. Similarly, it enables the customer to remain in the Shampoo area without the inconvenience of their occupying the actual basin.

PRODUCT OPTIONS

Available in Black basin (with black stand) or White basin (with silver stand).

If you require any further information on this product and the available options, please contact our London office on hairstyling@takara.co.uk

SHAMPOO STATION

FAQs

WILL THE BASIN MOVE DURING SHAMPOO?

No, the basin locks into position.

CAN I USE ANY SHAMPOO CHAIR WITH THE REAR SWING?

The chair will need to have an adjustable back recline and also be height-adjustable, but if unsure, please ask us.

WHAT IS THE NECK REST MADE OF?

It's a gel filled pouch, which moulds itself to the individual customer's neck.

DOES IT HAVE THERMOSTATIC WATER TEMPERATURE CONTROL?

Yes, the unit self regulates the water temperature for a consistent hair washing experience.
